CLAIM AMENDMENTS

- 1. (Currently Amended) A stent graft prosthesis for placement in a vessel 1 2 comprising:
- a graft portion including a first end, a second end, and a main body 3 portion, generally tubular in shape, that comprises a first layer of material; 4
- a cuff portion, having a first edge and a second edge, the first edge thereof located about the first end of the main body of the graft portion, the cuff portion comprising a second layer of material closely adjacent the main body portion wherein the second edge comprises one of a fraved portion and a fringed portion; and 9 .
- a supporting structure attached about the first end of the graft 10 portion and to the cuff portion. 11
- 2. (Original) The stent graft prosthesis of claim 1, wherein the cuff portion 1
- is folded over the main body portion such that the proximal, first end of the 2
- cuff portion comprises a folded edge and the second end comprises a free 3
- 4 edge.
- 3. (Original) The stent graft prosthesis of claim 2, wherein the cuff portion 1
- is folded over the outside of the main body portion. 2
- 4. (Original) The stent graft prosthesis of claim 3, wherein the cuff portion 1
- comprises a plurality of flaps extend over the first edge of the graft portion. 2
- 5. (Original) The stent graft prosthesis of claim 1, wherein the supporting 1
- structure includes an anchoring stent attached to the cuff portion and main 2
- body portion. 3

- 1 6. (Original) The stent graft prosthesis of claim 1, wherein the cuff portion
- 2 comprises one or more elements separate of the main body portion that are
- 3 attached thereto.
- 1 7. (Original) The stent graft prosthesis of claim 6, wherein the cuff portion
- 2 comprises an external sealing zone extending laterally from the main body
- 3 portion, the external sealing zone configured to engage the walls of the
- 4 vessel to facilitate sealing therebetween and reduce leakage of fluid.
- 1 8. (Cancelled)
- 1 9. (Cancelled)
- 1 10. (Previously Presented) The stent graft prosthesis of claim 1, wherein
- 2 the cuff portion comprises a second material different than that of the main
- 3 body material
- 1 11. (Currently Amended) A stent graft prosthesis for placement in a vessel comprising:
- a graft portion including a main body portion generally tubular in shape, that includes a first end and a second end;
 - a cuff portion comprising an external sealing zone generally located at or closely adjacent the first end of the graft portion, the external sealing zone having structure comprising a second layer of material that generally
- 8 encircles and extends laterally from the main body portion to create a
- 9 circumferential seal between graft portion and the adjacent walls of the
- 10 vessel to reduce leakage of bodily fluid thereabout; and
- 11 wherein the cuff portion comprises a band of material situated
- 12 therearound.

- 2 portion comprises a frayed portion.
- 1 13. (Original) The stent graft prosthesis of claim 11, wherein the cuff
- 2 portion comprises a fringed portion.
- 1 14. (Cancelled)
- 1 15. (Currently Amended) The stent graft prosthesis of claim4 11, wherein
- 2 the band of material comprises a second material, wherein the second
- 3 material is different than that of the main body of the graft portion.
- 16. (Currently Amended) A stent graft prosthesis for placement in a vesselcomprising:
- 3 a graft portion including a main body portion;
- an outer cuff portion, having a first edge and a second edge, that is
- 5 located about the first end of the graft portion and attached thereto
- 6 wherein the outer cuff portion comprises a frayed portion; and
- 7 an anchoring stent attached to the main body portion and outer cuff
- 8 portion, the anchoring stent extending proximally therefrom.
- 1 17. (Original) The stent graft prosthesis of claim 16, wherein the outer cuff
- 2 portion comprises an external sealing zone.
- 1 18. (Cancelled)
- 1 19. (Original) The stent graft prosthesis of claim 16, wherein the outer cuff
- 2 portion is folded over the main body portion with the anchoring stent being
- 3 attached thereover.

**TAIL No. 10/644,129

- 1 20. (Original) The stent graft prosthesis of claim 16, wherein the outer cuff
- 2 portion is folded over the main body portion with the anchoring stent being
- 3 attached between the outer cuff portion and the main body portion.
